Environmental Policy - KACE AS

Kace AS will work for an environmentally and sustainable development of society around us!

All employees at Kace shall contribute to reducing our environmental impact. We always strive to choose the most environmentally friendly alternatives where possible, especially regarding chemicals and substances.

We will achieve this by:

- Continuously improving and developing our environmental goals and following up on our results
- Ensuring our employees have all the necessary environmental competence to act responsibly towards the external environment
- Always striving to keep our climate footprint as low as possible
- Complying with the environmental requirements of our customers and society
- Emphasizing a positive environmental profile and communicating this to our customers
